

Superfy Release Notes  
Version 2.2  
December 2024

Superfy 2.2 offers users significant enhancements within the platform, based off interaction and engagement with our customer base. Notable changes include a new approach to the Collections and Assets modules, particularly Scheduling and Geofencing.

Official Release Note v2.2			
Module	Menu	Category	Summary
Collections	Scheduling	Enhancement	<p>Superfy's Scheduling 2.0 offers a range of new features to improve route planning and management.</p> <p><b>Advanced Scheduling:</b> Create and schedule routes in advance for daily or future use.</p> <p><b>Driver-Centric Access:</b> Drivers can access their assigned schedules, notes, and vehicle information directly through the Superfy App.</p> <p><b>Enhanced Filtering:</b> Easily add multiple containers to a route using the multi-select feature on the map.</p> <p><b>Real-time Monitoring:</b> Track the progress of collections in real-time, from upcoming to completed.</p> <p><b>Containers Ready for Collection but Not Scheduled:</b> The Scheduling feature also allows users to view the containers that are ready for collection but have yet to be scheduled.</p> <p>With Scheduling 2.0, you gain greater control and efficiency in managing your routes, collections, vehicles, and drivers.</p>
Assets	Geofencing	New!	<p>Stay informed about your assets' movements. Receive instant email notifications when they enter or exit designated areas. Additionally, generate comprehensive reports to analyse asset location history and duration.</p>
Reported Bugs	All	Fixes	<p>Your feedback is essential to us. We've addressed all issues and bugs reported by both customers and our internal teams in this update.</p>

## v2.2 Full Ticket List
